Experience

Information Security Consultant

First Information Technology Services, Inc

May 2019 - Present (1 year 4 months +)

- Penetration Tester for FITS' 3PAO team with experience conducting FedRAMP-compliant penetration tests for Cloud Service Providers (CSPs)
- Consultant for Microsoft Azure's Continuous Monitoring with a primary focus of reviewing large-scale vulnerability scan reports and providing detailed deviation requests to describe the true risk of a vulnerability compared to the reported risk
- Project lead for a six month technical privacy assessment of Microsoft Office products, which entailed network traffic analysis, local file analysis, and developing an automated approach to sift through ~100 GB of diagnostic data for personal data or sensitive information
- Cloud Security/Operations consultant for Software AG Government's FedRAMP environment with a focus on conducting, managing, and remediating monthly vulnerability scanning efforts, developing and reviewing security alerts and monitoring tools using various log sources, and performing daily cloud administration tasks such as IAM and identifying automation areas

Junior Cyber Defense Analyst

Defense Point Security, LLC

Dec 2018 - May 2019 (6 months)

- Identified, triaged, and reported malicious activity originating from numerous threat sources (phishing, web exploitation, etc.)
- Supported the security operations effort in multiple managed network environments through alerts generated from various log sources (IPS/IDS, firewall, network, etc.)
- Provided detailed reporting of potentially adverse events to clients by utilizing security software such as Splunk, FireEye HX/NX/AX, and several OSINT tools

Associate Information Security Analyst

TraceSecurity

Jun 2017 - Nov 2018 (1 year 6 months)

- Assessed organizations' security posture through social engineering and phishing exercises tailored to closely resemble vendors and roles frequently interacting with the client
- Installed and managed TraceSecurity's in-house vulnerability scanner for clients, providing non-technical stakeholders a breakdown of vulnerabilities impacting the organization and steps necessary to remediate them
- Conducted external penetration tests against clients' systems to identify any potential exploits or attacks the organization may face, such as: credential stuffing, default logins, security misconfigurations, and so forth

Senior Technical Support Operator

Louisiana State University

Dec 2014 - May 2017 (2 years 6 months)

- Lead technical support operator for a suite of law enforcement tools and websites that require prompt and efficient troubleshooting for potentially immediate issues

- Provided expertise in web issues preventing access to high-availability services and managed accounts to prevent unintended access to sensitive information
- Conducted helpdesk leadership duties such as writing weekly agendas used to increase the SLAs and quality of support provided by a managed team of support operators

Education

Louisiana State University

Bachelor's degree, Computer Science

2014 - 2018

3.4/3.7 GPA (Cumulative, Major)

Licenses & Certifications

CompTIA Security+ - CompTIA

Issued Aug 2018 - Expires Aug 2021

Associate of (ISC)² towards CISSP - (ISC)²

Issued Nov 2019 - Expires Nov 2020

729132

Offensive Security Certified Professional (OSCP) - Offensive Security

OS-101-52627
